## SUMMARY

Senior Software Engineer with over 5 years of backend development experience in Java, Spring Boot, Kafka, and RESTful microservices. Strong track record of delivering scalable, high-performance systems across fintech and HR tech domains. Experienced in AI-assisted development using GitHub Copilot, GPT-5, Claude, and Gemini, achieving 5–10x productivity gains. Seeking impactful roles in high-ownership, product-driven teams with experience in fast-paced fintech environments.

## PROFESSIONAL EXPERIENCE

### Pine Labs

Noida, India

#### Senior Software Engineer

Apr 2025 – Present

- Built Offer Engine as a SaaS product and integrated with merchants like ICICI and Juspay, contributing to 3x revenue growth of the offer engine
- Developed modular LazyPay adapter enabling seamless NBFC partner onboarding with minimal code changes
- Implemented UPI Instant Cashback features boosting merchant conversions
- Leveraged AI agents (GitHub Copilot, GPT-5, Claude, Gemini) to speed up microservice development, achieving 10x faster development cycles
- Created Client Onboarding Service enabling bulk onboarding within seconds (reduced go-live time from hours to seconds)
- Integrated multiple third-party fintech APIs for secure and scalable onboarding and transactions
- Improved backend performance by 30% through optimized database queries, Redis-based caching, N+1 query elimination, and JVM tuning.

### UKG

Noida, India

#### Senior Software Engineer

Jun 2023 – Apr 2025

- Developed and deployed features to enhance product capabilities, improving operations and user experience
- Implemented optimizations, increasing processing speed and reducing downtime
- Enhanced core services, optimizing system performance and ensuring smoother operations
- Developed microservices to improve customer SFTP account management, boosting scalability and security
- Designed scalable architecture solutions to handle increased loads while maintaining performance
- Led cross-functional teams to deliver key features on time and within budget

### KlearNow

Gurugram, India

#### Backend Engineer

Jul 2022 – Jun 2023

- Engineered end-to-end services for filing and calculating goods exported/imported in the Netherlands, boosting operational efficiency
- Integrated country-specific rules and regulations, streamlining customs clearance operations for over 10,000 users
- Designed automated solutions to generate shipment documents as PDFs at each process step, cutting manual effort by 50%
- Implemented automated data population and calculations, enhancing broker efficiency by 40% through improved accuracy and speed

### Accenture Solutions

Gurugram, India

#### Associate Software Engineer

Dec 2020 – Jul 2022

- Developed new features and integrations for New York Life (NYL) applications
- Designed reinsurance configuration flows in alignment with premium logic
- Built Automation Anywhere RPA bots to automate manual processes

## TECHNICAL SKILLS

Java, Java 8, Spring, Spring Boot, Hibernate, JDBC, JSP/Servlet, REST APIs, Kafka, Microservices, MySQL, PostgreSQL, SQL, Docker, DataDog, Git, Karate Framework, NightWatch, Microsoft Azure, AWS, Automation Anywhere, RPA Bots, Agile SDLC

## EDUCATION

### Madhav Institute of Technology and Science

Gwalior, India

Bachelor of Engineering in Information Technology – CGPA: 7.2

2020

### Ebenezer Hr. Sec. School

Gwalior, India

12th – 92.8% | 10th – CGPA: 9.6

2016
